INDEPENDENT AUDITOR'S REPORT

To the Board of Directors
Brown County Water Improvement District #1
Brownwood, Texas

Report on the Financial Statements

I have audited the accompanying financial statements of the business-type activities and each major fund of the Brown County Water Improvement District #1, as of and for the year ended August 31, 2018, and the related notes to the financial statements, which collectively comprise the Brown County Water Improvement District #1's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express opinions on these financial statements based on my audit. I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, I express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinions.

Opinions

In my opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities and each major fund of the Brown County Water Improvement District #1, as of August 31, 2018, and the respective changes in financial position, and cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis and the Schedule of Net Pension Liability identified as Required Supplementary Information in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational,

economic, or historical context. I have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to my inquiries, the basic financial statements, and other knowledge I obtained during my audit of the basic financial statements. I do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

My audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Brown County Water Improvement District #1's basic financial statements. The Other Supplementary Information and the Texas Supplementary Information listed in the table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Other Supplementary Information and the Texas Supplementary Information are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In my opinion, the Other Supplementary Information and the Texas Supplementary Information are fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, I have also issued my report dated December 10, 2018, on my consideration of the Brown County Water Improvement District #1's internal control over financial reporting and on my tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of my testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Brown County Water Improvement District #1's internal control over financial reporting and compliance.

BROWN COUNTY WATER IMPROVEMENT DISTRICT #1
MANAGEMENT'S DISCUSSION AND ANALYSIS - UNAUDITED
REQUIRED SUPPLEMENTARY INFORMATION

This section of Brown County Water Improvement District #1's annual financial report presents our discussion and analysis of the District's financial performance during the fiscal year ended August 31, 2018. Please read it in conjunction with the District's financial statements, which follow this section.

FINANCIAL HIGHLIGHTS

- The District's total net position was $16,478,102 at August 31, 2018 and $15,683,499 at August 31, 2017.
- During the year ended August 31, 2018, the District's operating revenues from the sales of water and entities revenues for debt service were $1,079,256 more than the $3,829,542 of operating expenses.
- The total operating expenses of the District were $53,781 less than last year. No new departments were added this year.
- The overall change in net position for the year ended August 31, 2018 was $794,603 as compared to $451,779 for the year ended August 31, 2017. The increase in the change in net position is because of increased operating revenues and decreased operating expenses.

OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of two parts-*management's discussion and analysis* (this section) and the *basic financial statements*. The basic financial statements include fund financial statements.

- The *fund financial statements* focus on the general operations of the District in a proprietary fund format.

- *Proprietary fund* statements offer *short-* and *long-term* financial information about the activities the government operates *like businesses*. The District's operating fund is a proprietary fund.

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data.

Fund Financial Statements

The fund financial statements are designed to present financial information of the District at a detailed level.

The District has only one fund:

- *Proprietary funds*-Services for which the District charges customers a fee are generally reported in proprietary funds. Proprietary funds provide both long-term and short-term financial information. The District has one Proprietary Fund – Enterprise Fund. All of the District's basic services are included here and consisted of sales of water to five entities, irrigation water sales, commercial leases, and lake dock and spaces permits.

FINANCIAL ANALYSIS OF THE DISTRICT AS A WHOLE

Net position. The District's net positions were $16,478,102 at August 31, 2018 and $15,683,499 at August 31, 2017. The components of the District's net positions were as follows:

	8-31-2018	8-31-2017	Percent Change
Net Investment in Capital Assets	$9,922,874	$9,773,126	(0.63%)
Restricted net position for debt service	595,758	582,027	2.46%
Unrestricted net position	5,959,470	5,328,346	10.35%
Net Position	$16,478,102	$15,683,499	

The unrestricted net position represents resources available to fund the programs of the District next year.

Changes in net position. The District's operating revenues were $4,908,798 for 2018 and $4,368,251 for 2017. The most significant portion of revenues in 2018 was from the sale of treated water to five entities within and around the District amounting to 66% of the total operating revenues. In addition, those five entities paid $1,338,522 (27% of the total operating revenues) for their pro-rata share of the current year debt service requirements. The amounts paid by each participating entity were determined by a five-year average of water usage of each entity. The remaining 7% of operating revenues comes from the sale of irrigation water and various 2-inch water connections and contracts.

The total operating expenses were $3,829,542 in 2018 and $3,883,323 in 2017. Non-operating expenses (bond issue costs and bond interest expense) were $329,764 in 2018 and $354,432 in 2017. Comparative ratios of expenses are as follows:

	8-31-2018	8-31-2017
Salaries and benefits	41.00%	41.49%
Utilities and telephones	8.64%	7.42%
Repairs and maintenance costs	5.94%	6.05%
Supplies	10.42%	8.67%
Depreciation	22.29%	24.63%
Professional fees	.93%	.70%
Insurance	1.92%	1.93%
Bonded debt expenses	7.93%	8.36%

Net operating income (loss) for the year ended August 31, 2018 was $1,079,256 as compared to $484,928 as of August 31, 2017, an increase of $594,328 over the prior year. The changes to the net operating income were as follows:

	Increase (Decrease)	Percentage Change to Prior Year
Treated water sales	$460,391	16.49%
Entities revenues for debt service	$122	.01%
Irrigation water sales	$97,208	87.32%
Water connections and contracts	($17,174)	(13.49%)
Total change in operating revenues	$540,547	
Administration expenses	($114,607)	(19.14%)
Field Operations expenses	$48,026	7.72%)
Lake Patrol expenses	5,566	1.68%
Treatment Plant expenses	$84,633	6.98%
Other non-departmental expense	$39,578	52.76%)
Depreciation	($116,977)	(10.92%)
Total change in operation expenses	($53,781)	

Non-operating revenues in 2018 amounted to $431,091. Rental and lease income was 59% of that total. The rental and lease income consists of rentals of docks and spaces on Lake Brownwood and lots, land, grassland, and a rent house owned by the District. Gain on sale of capital assets in 2018 was $75,997 (18%) and consisted of the sale of lots at the Peninsula Subdivision. Interest earned on investments accounted for 17% of the non-operating revenues.

FINANCIAL ANALYSIS OF THE DISTRICT'S FUNDS

Operating revenues from business-type activities totaled $4,908,798. Treated water rates increased from a rate of $1.5924 in 2017 to a rate of 1.6495 in 2018, resulting in a 3.59% increase. Untreated water rates increased from a rate of $0.9563 in 2017 to a rate of 1.0061 in 2018, resulting in a 5.21% increase.

Enterprise Fund Budgetary Highlights

The District formulates and approves a flexible budget to control expenses but the budget is affected by the demand for water. The revenues budgeted are based on water rates set by the Board. The water rates are determined by a five-year running average of total gallons of water sold. Actual operating revenues, not including the entity payments for debt service, were more than the estimated operating revenues by $356,276 during the fiscal year. Actual operating expenses were $46,992 more than the final budgeted operating expenses, which amounts to 1.53% of the final budget.

Amendments to the original budget amounted to the following increases (decreases). The final favorable (unfavorable) budget variances were as follows:

	Final Budget Increase (Decrease) Over Original Budget	Percent of Change Over Original Budget	Favorable (Unfavorable) Budget Variances
Departments:			
Administration	($80,000)	(10.36%)	$ 12,167
Field Operations	-0-	-0-	5,843
Lake	11,700	3.30%	21,537
Treatment Plant	160,000	13.54%	28,049
Non-departmental	-0-	-0-	(114,588)

A Budgetary Comparison Statement is presented in the other supplementary information of this audit report.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets

At August 31, 2018 the District had invested $21,437,874 in a broad range of capital assets, including real estate and reservoirs, construction in progress, infrastructure, buildings, and machinery and equipment. This amount represents a net decrease (including additions and deductions) of $845,252 or 3.79% over last year.

The District's fiscal year 2018 included the purchase of a boat motor and additional improvements to Flat Rock Park.

Long Term Debt

At August 31, 2018, the District had long-term debt of $11,515,000 in revenue bonds. During 2017-2018, the District paid $995,000 in bond principal. Next year's bond principal payment is scheduled to be $1,020,000.

BCWID RETIREE PLAN

Governmental Accounting Standards Board (GASB) No. 68 was implemented as required for the BCWID Retiree Plan in 2014-2015. GASB 68 established standards of accounting and financial reporting for defined benefit pensions and defined contribution pensions provided to the employees of state and local government employers through pension plans that are administered through trusts or equivalent arrangements. GASB Statement 68 established standards for

measuring and recognizing liabilities, deferred outflows of resources, and deferred inflows of resources, and expenses related to pensions. Even though BCWID Retiree Plan is a group annuity contract, the defined contributions for the Retiree Plan do not meet the definition of a defined contribution plan in accordance with the Governmental Accounting Standards Board (GASB) Statement 68. The BCWID Retiree Plan is a group annuity contract that provides pension benefits to three retirees that were receiving monthly benefits from the defined benefit plan from prior years. When the old defined benefit plan was terminated in 2011, the BCWID Retiree Plan was established to continue providing the three retirees with their pension benefits. In September 2017 the BCWID funded the annual amount necessary to pay the three retirees their pension benefits. The pension liability at August 31, 2018 was $264,939, a net decrease of $153,580 for the fiscal year. The present value of the pension liability decreased $74,492 after payments totaling $68,771were paid to the three retirees. Due to the death of the spouse of the former general manager who was one of the retirees, the present value of the pension liability decreased and additional $79,088. As of August 31, 2018, the District has two retiree participants in this plan. The deferred inflow of resources continues to be amortized at a rate of $1,858 per year. The deferred outflow of resources continues to be amortized at a rate of $7,766 per year.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

- The rate for treated water for 2018-2019 was set by the Board at $1.6647 per 1,000 gallons, an increase of $0.0152 per 1,000 gallons. The untreated water rate for 2018-2019 was set at $1.0011 per 1,000 gallons, a decrease of $0.005 per 1,000 gallons. Treated and untreated water sales are estimated at $3,033,000 for 2018--2019. Irrigation water sales and 2-inch water connections are estimated at $175,000 for 2018-2019. Commercial leases, docks and spaces, lot, land, and grass leases were budgeted at $228,000. Miscellaneous sales and interest earned on investments were budgeted at $35,000. Total budgeted revenues for the year ended August 31, 2018 is $3,471,000.

- In addition to the treated water sales, each of the five entities that purchase treated water from the BCWID will also pay the District a debt service charge equal to the annual amount of debt service payments required by the bonded debt. Debt service requirements for the year ended August 31, 2019 is $1,325,335.

- The budgeted expenses for the District totaled $3,471,000 for 2018-2019. The overall budget for expenses for 2018-2019 is $87,270 less than the final budgeted expenses for 2017-2018.

These indicators were taken into account when adopting the operating fund budget for year ended August 31, 2018. Unrestricted net position available for appropriation in the enterprise fund is $5,959,470 at August 31, 2018. If these estimates are realized, the District's unrestricted net position is not expected to increase significantly by the close of the 2019 fiscal year.

CONTACTING THE DISTRICT'S FINANCIAL MANAGEMENT

This financial report is designed to provide our citizens, customers, and investors and creditors with a general overview of the District's finances and to demonstrate the District's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the General Manager or the Board of Directors at the District Administration Office located at 501 East Baker, Brownwood, Texas.

(Increase) decrease in accounts receivable	($120,057)
(Increase) decrease in inventories	($7,243)
(Increase) decrease in prepaid insurance	($1,936)
Increase (decrease) in accounts payable	($9,270)
Increase (decrease) in accrued wages and benefits payable	($46,334)
Increase (decrease) in accrued compensated balances	($56,359)
Increase (decrease) in net pension liability	($153,580)
Net cash provided (used) by operating activities	$1,617,364

Supplemental Schedule of Noncash Flows and Financing Activities

The Maintenance and Operating Fund of the Brown County Water Improvement District #1 had no noncash acquisition activities during the year ended August 31, 2018.

Disclosure of Accounting Policy

For purposes of the Statements of Cash Flows, the Brown County Water Improvement District #1 considers cash and temporary investments maturing in less than three months as cash and cash equivalents.

The Notes to the Financial Statements are an integral part of this statement.

Note 1 – Description of the District

The Brown County Water Improvement District #1 (BCWID) was created by the Commissioners Court of Brown County on November 27, 1926 for the purpose of irrigating 14,000 acres including the areas of the City of Brownwood. Additions to the District have resulted in a current area of 24,995 acres.

The District's first bond issue ($550,000; 5-23-38) provided a portion of the funds to construct the water conveyance canal, filtration plant, and storage tank. A Public Works Administration Grant supplied the remaining funds.

By the order of the Texas Water Rights Commission on September 11, 1978, the District was converted to a municipal utility district retaining the name of Brown County Water Improvement District #1 and the right of eminent domain as granted by Section 55.291 of the Texas Water Code.

A five member Board of Directors elected by the voters of Brown County governs the District. The Board is organized with a president, vice president, and secretary appointed annually by the board members. The General Manager is hired by the Board and serves as deputy secretary of the Board, but has no vote. The primary source of revenues for the District is from wholesale water sales to five area entities. Other revenues are from the various rentals of land and facilities and from the sale of irrigation water.

The financial statements of the Brown County Water Improvement District #1 include all funds and account groups over which the Board of Directors exercises oversight responsibility. The District is not financially accountable for any other organization, nor is it a component unit of any other government.

Note 2 – Summary of Significant Accounting Policies

The financial statements of the Brown County Water Improvement District #1 have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to local governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial principles. The most significant of the District's accounting policies are described below.

A. Basis of Presentation

The District's basic financial statements consist of enterprise fund financial statements for its maintenance and operating fund. The enterprise fund financial statements include enterprise fund (1) statement of net position, (2) statement of revenues, expenses, and changes in net position, and (3) statement of cash flows.

Fund Financial Statements:

Fund financial statements are designed to present financial information of the District at this more detailed level. The District has only one fund.

PROPRIETARY FUNDS

Proprietary funds reporting focuses on the determination of operating income, changes in net position, financial position, and cash flows. The District's proprietary fund is an enterprise fund. Enterprise funds may be used to account for any activity for which a fee is charged to external users for goods and services. The District's maintenance and operating fund is a major enterprise fund. There are no nonmajor funds.

B. Measurement Focus

Fund Financial Statements – The District's proprietary fund is accounted for on a flow of economic resources measurement focus. All assets and deferred outflows of resources and all liabilities and deferred inflows of resources associated with the operation of this fund are included on the statement of fund net position. The statement of changes in revenues, expenses, and changes in fund net position presents revenues and expenses in net total position. The statement of cash flows provided information about how the District finances and meets the cash flow needs of its proprietary activities.

C. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recorded when a liability is incurred or economic asset used, regardless of the timing of related cash flows. The District's Maintenance and Operating Fund financial statements are prepared on the accrual basis of accounting.

D. Contractual Relationships

The District and the City of Brownwood have a contractual relationship in a water supply contract. The water rates are computed and adjusted annually through the calculation of a five-year average component for operation and maintenance of the District's facilities.

The District also has water supply contracts with the City of Bangs, City of Early, Brookesmith Special Utility District, and Zephyr Water Supply.

The accounts of the above named five entities are excluded from the accompanying financial statements because each entity is an autonomous agency that is governed by its own City Council or Board of Directors and the Brown County Water Improvement District #1 has no oversight responsibilities for any of the five entities.

The five entities have only the rights of purchasing water from the District as specified in each of their water supply contracts and have no equity interest in the plant owned by the District.

E. Cash and Cash Equivalents

For purposes of the Maintenance and Operating Fund statement of cash flows, the District considers cash on hand, demand deposits, and temporary investments as cash and cash equivalents. Temporary investments (consisting of certificates of deposit) are those investments with an original maturity date of three months or less. Temporary investments are stated at cost, which approximates fair value.

F. Investments

The District's investment policy allows investments in all investment opportunities allowed under the Public Investment Act Chapter 2256. The District investments consist of only certificates of deposit and are stated at cost, which is the fair value.

G. Receivables

The Brown County Water Improvement District #1 recognizes receivables on the accrual basis of accounting. The receivables include:

Accounts Receivable – Customers and Users

Accounts receivables consist of amounts owed to the District primarily from five entities for the sale of water. In addition, there are receivables owed by individuals for irrigation water sales, annual leases of land, docks permits, spaces permits, and commercial stalls on the lake.

The District uses the direct write-off method of accounting for uncollectible accounts. The Board of Directors approves the charging off bad debts only after every avenue available for collection has been addressed. The District does not recognize an allowance for uncollectible accounts. Uncollectible accounts have not been significant in past fiscal years.

Accrued Interest Receivable

Accrued interest receivable represents accrued interest receivable on investments held by the District.

Account Receivable from Forfeited Funds in Employee Pension Plan

The BCWID 401(a) Discretionary Plan, an allocated group annuity contract issued by the American United Life Insurance Company had a balance of $16,560 in the forfeiture account. The forfeiture account is created when employees leave the District and are not fully vested. The portion of the employer contributions that is not vested goes into the forfeiture account.

H. Inventories and Prepaids

Inventories held by the Enterprise Fund (Maintenance and Operating) consist of expendable supplies held for consumption and are priced at cost based on the first-in-first-out cost method. The expendable supplies consist of the lot supply inventory and treatment plant chemicals. A physical inventory is taken annually at year-end. The cost of the inventory is capitalized and is recorded as expenditures at the time of consumption.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items.

I. Restricted Assets

Mandatory segregations of assets are presented as restricted assets. Bond agreements and other external parties require such segregations. Current liabilities payable from

these restricted assets are so classified. The excess of restricted assets over current liabilities payable from restricted assets is shown as restricted net position.

J. Capital Assets

All capital assets are capitalized at cost (or estimated historical cost) and updated for additions and retirements during the year. Donated fixed assets are reported at their fair market value as of the date received. The District's infrastructure consists of the lake and other reservoirs, water supply pipelines and canals, water treatment plants, and water storage tanks. Improvements are capitalized; the costs of normal maintenance and repairs that do not add to the value of the asset or materially extend an asset's life are not. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

All capital assets are depreciated, except for land and construction in progress. Improvements are depreciated over the remaining useful lives of the related capital assets. Useful lives for infrastructure were estimated based on the District's historical records of necessary improvements and replacements.

To the extent the District's capitalization threshold of $5,000 is met, capital outlays of the Proprietary Funds are recorded as capital assets and depreciated over their estimated useful lives in the fund financial statements using a straight-line method.

The following estimated useful lives are used in computing the straight-line depreciation:

Description	Business-type Activities Estimated Lives
Buildings and improvements	20-50 years
Machinery and equipment	3-10 years
Infrastructure	15-35 years

K. Employee Compensated Balances

Employees accrue vacation leave at a rate per month based on the length of employment service. Employees may not accrue more than 30 days vacation leave. On each employee's hire-date anniversary, the days in excess of 30 on the hire-date are lost.

In addition to the vacation leave, employees other than supervisors also accrue compensatory overtime benefits at a rate of 1.5 times the actual hours worked. All employees including supervisors accrue holiday benefits at a rate of the normal workday hours.

All unused vacation leave (not exceeding 30 days), compensatory overtime, and holiday benefits accrued is payable upon resignation, retirement, or death to all employees. The District accrues a liability for the employee unused vacation leave, compensatory overtime, and holiday benefits in the proprietary fund.

Employees also have 10 days each year of sick leave that accumulates and carries forward to subsequent years. Retiring employees with 20 years of service to the District are paid for up to 90 days of unused sick leave.

L. Pension – BCWID Retiree Plan

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the BCWID Retiree Plan and additions to/deductions from BCWID Retiree Plan fiduciary net positon have been determined on the same basis as they are reported by the BCWID Retiree Plan. For this purpose, benefits payments are recognized when due and payable in accordance with benefit terms.

M. Net Position

Net positions represent the difference between assets and deferred outflows of resources, and liabilities and deferred inflows of resources. Net positions are classified in the following categories:

Net investment capital assets – This amount consists of capital assets, net of accumulated depreciation and reduced by outstanding debt that is attributable to the acquisition, construction, or improvement of those assets.

Restricted net position – This amount is restricted when there are limitations imposed on its use by either external restrictions imposed by creditors, grantors, contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or enabling legislation.

Unrestricted net position – This amount is the net position that does not meet the definition of "restricted net position" or "net investment in capital assets".

When an expense is incurred for purposes for which both restricted and unrestricted resources are available, the District uses the restricted resources first for the expense.

N. Operating Revenues and Expenses

Operating revenues are those revenues that are generated directly from the primary activity of the proprietary funds. For the District, these revenues are charges for the sale of water to five entities, sale of irrigation water to various customers, and other water contracts and 2-inch connections.

Non-operating revenues and expenses are those revenues not directly related to the District's sale of water. These revenues include the rental and lease of various properties owned by the District and permits issued for docks in the lake and spaces around the lake. Interest earned on investments and miscellaneous revenues are classified as non-operating revenues. The gain (loss) on the sale of capital assets is also reported as non-operating revenues.

O. Budgets and Budgetary Accounting

The District formulates and approves a flexible budget to use as a control device to manage and control expenses during the fiscal year. The budget is affected by the changes in demand for water during the fiscal year. If there is a lot of rain during the year, the water sales appropriately decrease as demand for water decreases. Along with the decreased demand for water, certain expenses such as utilities and repairs also decrease.

The Enterprise Fund (Maintenance and Operating) budget uses accrual concepts except that capital asset purchases (other than bonded debt related to construction) and significant purchases of inventory are reflected as expenses in the year of purchase. In addition, debt service revenue, depreciation on capital assets, bond interest expenses, bond issue fees and costs, and the accrued employee compensated balances are not budgeted.

The Brown County Water Improvement District #1 follows these procedures in establishing the budgetary data reflected in the financial statements:

1. Prior to September 1, the General Manager submits to the Board of Directors a proposed operating budget for the fiscal year commencing September 1. The operating budget includes proposed expenditures and the means of financing them. The proposed water rates are calculated on a running five-year average of the gallons of water sold divided by the estimated operating costs for the budget year.

2. Prior to September 1, the Board of Directors legally adopts the budget at the department level.

3. The Board of Directors approves various changes to its budget throughout the year to reflect additional obligations incurred by the District during the fiscal year. Department supervisors may amend the budget for individual budget categories within their own department. The Board approves final budget amendments prior to year-end.

P. Estimates

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

Q. Risk Management

The District is exposed to various risks of loss related to torts, theft, damage, or destruction of assets, errors, and omissions, injuries to employees, and natural disasters. During the year ended August 31, 2018, the Brown County Water Improvement District #1 was a member of the Texas Water Conservation Association Risk Management Fund (Fund). The Fund is a public entity risk pool composed of three separate self-insurance programs. The Fund is governed by an eleven member Board of Trustees comprised of senior management from member districts and authorities. Each board member is elected by the Fund's membership and serves overlapping three-year terms. Members pay contributions to the Fund for purposes of obtaining coverage against risks associated with worker's compensation, liability, or property. The District participates in each of the Fund's programs. The Fund operates as a risk-sharing pool by assuming the risks related to the contributions paid by each member regardless of whether the group continues to be a participating member of the Association. With the exception of any deductibles or retrospective rated coverage, the members fully transfer their risks to the Fund. The BCWID retains a small risk on an annual deductible amount on each type of insurance coverage. There were no significant reductions in coverage in the past fiscal year and there were no settlements exceeding insurance coverage for each of the past three fiscal years.

The District also provides health care to its employees through a commercial insurance with no risk retained by the District. The employees may pay premiums for spouse and/or family members. Employees, at their retirement, may pay the premiums for coverage, if they elect to do so. The District does not pay any portion of the retired employee's coverage.

Note 3 – Deposits and Investments

At August 31, 2018, the District's operating cash and investments were as follows:

MAINTENANCE AND OPERATING FUND	Proprietary Fund – Statement of Net Position
Cash and Investments:	
Cash and Cash Equivalents:	
Cash on hand	$ 275
Cash in bank	1,327,536
Certificates of Deposit, Maturity in 3 months or less	2,703,100
Total Cash & Cash Equivalents	$ 4,030,911
Investments with maturities of more than 3 months:	
Certificates of Deposit	$1,854,050
Total Cash and Investments – Current Assets	$5,884,961
Restricted Cash:	
Interest & Sinking cash in bank	$ 621,710
Total Restricted Cash	$ 621,710
Total Cash and Investments	$6,506,671

Deposits

The Citizens National Bank is the authorized official depository for the District's operating accounts and debt service account. Deposits are stated at cost, which approximates fair value.

Under state law, these deposits must be secured by federal deposit insurance and pledged securities owned by the fiscal agent bank. All securities serving as collateral are specifically pledged to the District and held in a custodial account at a third-party financial institution. The market value of the pledged securities plus the federal deposit insurance must at all times equal the amount on deposit at the depository bank. The District maintains copies of all safekeeping receipts of the securities that are pledged to the District by the depository bank. Those securities cannot be changed or released without the approval of the District.

At year-end, the cash and investments on deposit at the depository bank had a carrying amount of $6,506,396 and a bank balance of $6,550,902. The bank balance was properly secured by applicable FDIC coverage and pledged securities at August 31, 2018 and at all times throughout the fiscal year.

Custodial Credit Risk – Deposits: For deposits, custodial credit risk is the risk that in the event of a financial institution failure, the District's deposits may not be returned to the District. The District was not exposed to custodial deposit risk at August 31, 2018.

Investments – Operating Funds

Custodial credit risk - Investments: For an investment, custodial credit risk is risk that, in the event of the failure of the counterparty, the District will not be able to recover the value of its investments or collateral securities that are in possession of its safekeeping custodian. The District is not exposed to custodial credit risk at August 31, 2018.

Credit risk: Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligation. All of the District's investments for the operating and maintenance fund consist of certificates of deposit at the depository bank. Interest is paid on the certificates of deposit based on the rates determined in the depository contract. The District is not exposed to credit risk at August 31, 2018.

Interest rate risk: Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The District's investment policy allows investments in certificates of deposit with a maximum maturity of one year. Historically, the District has invested in certificates of deposit at the depository bank for terms ranging from thirty days to a maximum of one year. The interest rate for each certificate of deposit is determined by the depository contract stated rates. The interest rates are based on a sliding scale with larger amounts invested earning more than smaller amounts invested. The District was not exposed to interest rate risk at August 31, 2018.

Concentration of credit risk: Concentration of credit risk is the risk of loss attributed to the magnitude of the District's investments in a single issuer. All of the District's investments for the operating and maintenance fund consist of certificates of deposit at the depository bank. Interest is paid on the certificates of deposit based on the rates determined in the depository contract.

Note 4 – Accounts Receivable

The accounts receivable of the Brown County Water Improvement District #1 at August 31, 2018 were as follows:

Accounts Receivable - customers:		
District Water Customers:		
City of Brownwood	$	180,389
Brookesmith Special Utility District		101,159
City of Bangs		10,577
City of Early		23,381
Zephyr Water Supply		25,329
Irrigation Customers		108,468
Other Customers Receivables (Credits)		7,574
Total Accounts Receivable – customers		456,877
Accrued interest receivable on investments		12,301
Accounts receivable – other		5,000
Account receivable – forfeiture account in Employee Pension Plan		16,560
Total Accounts Receivable	$	490,738

At this time, these accounts receivable are considered collectible within one year.

Note 5 – Capital Assets

	Balance 9-1-2017	Additions	Retirements	Balance 8-31-2018
Business-type Activities:				
Capital assets not being depreciated:				
Real Estate and Reservoirs	$ 2,104,368	$	$	$ 2,104,368
Construction in Progress	0	0	0	0

Buildings	(439,111)	(7,270)		(446,381)
Machinery and equipment	(1,206,736)	(57,718)	0	(1,264,454)
Total capital assets being depreciated, net	20,178,758	(845,250)	0	19,333,508
Business-type Capital Assets, net	$ 22,283,126	$ (845,250)	$ 0	$ 21,437,876

Depreciation expense for the year ended August 31, 2018 was $926,979.

Additions to the capital assets included a new boat motor and additional improvements to the Flat Rock Park.

Note 6 – Long-Term Debt

In October 2004, the District made application to the Texas Water Development Board (TWDB) seeking financial assistance to provide funds for making certain water improvements, in accordance with the State Water Revolving Fund. TWDB approved the application. The City of Brownwood's water supply contract with the District requires the City to pass an ordinance approving the issuance of the bonds of the District and to serve as the primary obligated party for the bond issue (as has been the case on all previous bond issues of the BCWID #1). In November 2005, the District and City executed a Memorandum of Understanding (MOU) regarding the water system improvement project.

In October 2006, the Board of Directors approved the certificate for order authorizing the issuance, sale, and delivery of the Brown County Water Improvement District No. 1 Revenue Bonds, Series 2006, in the principal amount of $20,490,000. The bonds are dated August 1, 2006. These bonds are issued through the Drinking Water State Revolving Fund. The District submitted requests for reimbursements of allowable

construction costs along with the supporting documentation of those expenditures to the TWDB as construction progressed. As the TWDB reviews and approves the reimbursements, the bonds are funded and the proceeds are remitted to the District. The bond funds remitted to the District represent pass-through Federal Assistance provided by the Environmental Protection Agency. All of the revenue bonds have been issued as of August 31, 2017.

The Modification No. 1 to the Water Supply Contract dated January 1, 2000 with the City of Brownwood is a part of the certificate for order authorizing the 2006 revenue bonds. The modified water supply contract provides that a debt service charge of a fixed monthly payment will be paid by the City of Brownwood and other contracting parties (Brookesmith Special Utility District, City of Early, Zephyr Water Supply, and City of Bangs) for the annual debt service requirements. The monthly debt service charges are calculated to produce monies enough to pay the required debt service payments as they become due. The City of Brownwood is liable for payment of all of the principal and interest on the bonds. However, the other contracting parties pay a portion of the debt service charge based on the percentage of treated water sold to those entities over the last five years.

The bonds are payable from and secured by an irrevocable first lien on and pledge of the pledged revenues. The bonds are secured by and payable only from the pledged revenues and are not secured by or payable from a mortgage or deed of trust on any real, personal, or mixed properties constituting the System.

The BCWID will provide annually to each NRMSIR (nationally recognized municipal securities information repository) and any SID (state information repository), within six months after the end of each fiscal year, financial information and operating data with respect to the District. The Issuer will notify any SID and either each NRMSIR or the MSRB (Municipal Securities Rulemaking Board), in a timely manner, of any material event notices.

The bond principal is payable on February 1 of each year beginning in 2009. Interest on the bonds is payable semiannually on each February 1 and August 1, beginning on February 1, 2007. The bond interest rates vary from 2.150% up to 2.950%. Once all bonds are issued, the maturity terms of the bonds range from February 1, 2009 through February 1, 2028. The bonds and interest are payable to the paying agent, Regions Bank, Houston, Texas. The balance of the long-term debt at August 31, 2018 was $11,515,000.

The 2006 Bond Order requires that the District "fix, establish, maintain, and collect such rates, charges, and fees for the use and availability of the System at all times as are necessary to produce Gross Revenues sufficient, together with any other Pledged Revenues, (1) to pay all current operation and maintenance expenses of the System, and (2) to produce Pledged Revenues for each year at least equal to one times the principal and interest requirements of all then outstanding Bonds and Additional Bonds for the year during which such requirements are scheduled to be the greatest." The District is in compliance with the required Rate Covenant for the year ended August 31, 2018.

Changes in long-term debt for the year ended August 31, 2018 are as follows:

	Beginning 9-1-2017	Issued	Retired	Ending 8-31-2018	Amount due in one year
Revenue bonds, Series 2006	$12,510,000	-0-	$995,000	$11,515,000	$1,020,000
Net pension liability	$418,519		153,580	$264,939	0
Accrued compensated balances	$338,520	$38,158	94,518	$282,160	$ 70,540
Total Long-Term Debt	$13,267,039	$38,158	$1,243,098	$12,062,099	$1,090,540

Revenue Bonds Debt Service Requirements as of August 31, 2018 are as follows:

For Years Ending August 31,	Principal	Interest	Total
2019	$ 1,020,000	$ 305,335	$ 1,325,335
2020	1,045,000	278,745	1,323,745
2021	1,070,000	250,982	1,320,982
2022	1,100,000	221,955	1,321,955
2023	1,130,000	191,567	1,321,567
2024-2028	6,150,000	455,041	6,605,041
Totals	$ 11,515,000	$ 1,703,625	$ 13,218,625

Total interest cost incurred during the current fiscal year was $328,958. Bond issue costs amounted to $806.

Note 7 – Deferred Outflow and Inflows of Resources

In addition to assets and liabilities, the statement of net position will sometimes report a separate section for deferred outflows of resources and deferred inflows of resources. These separate financial statement elements, *deferred outflows of resources* and *deferred inflows of resources,* represent acquisitions of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) or an outflow of resources (expenditures) until that time. At August 31, 2018, there was deferred outflows of resources amounting to $31,713 and deferred inflows of resources amounting to $8,055 related to the BCWID Retiree Plan. Additional disclosures are discussed in Note 8 Employee Retirement Plans – BCWID Retiree Plan.

Note 8 – Employee Retirement Plans

Employees Retirement Fund

Effective September 1, 2011, the BCWID adopted a cash or deferred profit sharing plan and is known as the BCWID Defined Contribution Plan. This Plan is a single-employer plan. The Plan Administrator is the BCWID and the Plan Trustees are the general manager and two board members of the District. The Plan covers substantially all employees of the District. Each employee is eligible for coverage in the plan when he/she

has worked 6 months or longer. Minimum age of participants must be 20.5. Elective deferral contributions by employees are not permitted. Matching contributions are not permitted. Normal retirement age is 65. The Plan does not provide an early retirement age.

Within the defined contribution plan, the District established the BCWID 401(a) Discretionary Plan, an allocated group annuity contract issued by the American United Life Insurance Company. The contract is an agreement between the District as the sponsoring employer/plan trustee and AUL. An allocated contract means that every participant who holds assets in the Plan will have an individual account. Each participant account maintains each money source separately and each participant will determine the investments for his account. The BCWID 401(a) Discretionary Plan is funded through biweekly payments from the District based on a percentage of gross payrolls for each employee. An annual "catch-up" contribution is made each September to fund the amount needed for each of the participants to accumulate the same benefit amount due that would have been available under the old defined benefit plan in effect in prior years. This annual "catch-up" contribution is subject to resources available and appropriation by the Board each fiscal year.

An analysis of defined contribution payments to the 401A Discretionary Plan follows:

Total payroll for the fiscal year ended 8-31-2018	$1,339,431	
Total covered payroll	$1,112,935	
Annual contributions, based on percentage of gross payroll	$83,346	7.49%
Annual catch-up contribution for participants in the old defined benefit plan	$63,276	5.69%
Total annual contributions to defined contribution plan	$146,622	13.18%

BCWID Retiree Plan

Previous to adopting the defined contribution plan, the BCWID had three retirees receiving monthly benefits from the defined benefit plan that was terminated effective August 31, 2011. To continue to provide the same benefits due to these retirees, the remaining assets from the defined benefit plan trust were transferred to a new group annuity contract for the BCWID Retiree Plan. Once those assets were used, the District began funding the annual amount necessary for the retirees' benefits each September. In September 2017 the District contributed $78,500 to fund the 2017-2018 payments due to the Retirees.

Even though BCWID Retiree Plan is a group annuity contract, the defined contributions for the Retiree Plan do not meet the definition of a defined contribution plan in accordance with the Governmental Accounting Standards Board (GASB) Statement 68. GASB 68 establishes standards of accounting and financial reporting for defined benefit pensions and defined contribution pensions provided to the employees of state and local government employers through pension plans that are administered through trusts or equivalent arrangements. GASB Statement 68 establishes standards for measuring and recognizing liabilities, deferred outflows of resources, and deferred inflows of resources, and expenses related to pensions. Note disclosure and RSI requirements about pensions also are addressed. For defined benefit pension plans, this statement identifies the methods and assumptions that should be used to project benefit payments, discount projected benefit payments to their actuarial present value, and attribute that present value to periods of employee service.

At August 31, 2018, the District reported a net pension liability of $264,939. The net pension liability was measured as of August 31, 2018 and the total pension liability was determined by an actuarial valuation as of August 31, 2018. The present value of benefits was calculated by 2000 RP mortality table at 5.5% interest. There were no active employees included in the BCWID Retiree Plan. Total payments to the three retirees amounted to $68,771. At August 31, 2017, the retiree pension plan owed the estate of former general manager $19,563, which is equal to six months retirement benefits. The company did not receive proper documents to release the payments to the beneficiary until October, 2017. The pension plan had funds available to pay the amounts due to the estate of the former general manager.

	Increase (Decrease)		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a-b)
Balance at 8-31-2017	$438,837	$20,318	$418,519
Changes for the Year:			
Pension plan investment income		$588	($588)
Employer contributions		$78,500	($78,500)
Difference between expected and actual experience	($74,492)		($74,492)
Benefit payments	($68,771)	($68,771)	-0-
Net changes	($143,263)	$10,317	($153,580)
Balance at 8-31-2018	$295,574	$30,635	$264,939

The effects of the differences between expected and actual experience are required to be included in pension expense in a systematic and rational manner over a closed period equal to the average of the expected remaining service lives of the three inactive employees that are provided with benefits through the pension plan. A deferred inflow of resources of $11,771 was created by the decrease of the present value of retiree benefits as of August 31, 2017. The deferred inflow of resources will be amortized over 6.35 years, which is the average remaining lives of the three retirees as of August 31, 2017. The amortization of that cost will be $1,858 each year.

The deferred outflow of resources created as August 31, 2016 continued to be amortized by $7,766 during the current year. For the year ended August 31, 2018, the District recognized net pension expense of $5,908 less the pension plan investment income of $588 credited to the plan.

The amounts of the District's balances of deferred outflows of resources related to the BCWID Retiree Plan will be recognized in pension expense as follows:

Year Ended August 31:	Pension Expense Amount
2019	$ 5,908
2020	$ 5,908
2021	$ 5,908
2022	$ 5,908
Thereafter	$ 26

Deferred Compensation Plan – Internal Revenue Code Section 457

The District has made available to its employees a deferred compensation program (457 Plan), created in accordance with Internal Revenue Code Section 457. The 457 Plan permits employees to defer from a minimum of 3% up to a maximum of 15% (not greater than 25%) of compensation. The deferrals are not available to employees until termination, retirement, death, or unforeseeable emergency. Distributions are made by lump sum payout only. All amounts of compensation deferred under the plan, all property and rights purchased with those amounts, and all income attributable to those amounts, are held for the exclusive benefits of the employees and their beneficiaries. The Plan assets are allocated to separate accounts to each participant employee. The District matches 3% of the deferred compensation.

During the year ended August 31, 2018, the total amounts contributed to 457 Plan were:

Total covered payroll	$1,070,628	
Employee contributions, based on percentage of gross payroll designated by each employee	$63,326	5.91%
District matching contribution	$33,262	3.11%
Total contributions to 457 deferred compensation plan	$96,588	9.02%

Total District Retirement Expense

For the year ended August 31, 2018, the District recognized $110,713 for retirement expense. In addition, the District paid $800 for the actuarial calculation of present value of retiree benefits.

Note 9 – Budget Variances

The budget for the Enterprise Fund (Maintenance and Operating Fund) is a flexible budget adopted to control expenses but is affected by the demand for the water. There were no Unfavorable budget variances were incurred in the departmental expenses for the year-ended August 31, 2018. Within each of the departmental budgets, various line items had unfavorable variances. The detailed Budgetary Comparison Statement is presented in a separate schedule as other supplementary information.

Note 10 – Restricted Net Position

Restricted net position at August 31, 2018 amounted to $595,758, restricted for Debt Service. At August 31, 2018, the District had restricted assets of cash for debt service of $621,710 along with related liabilities of accrued interest payable of $25,952.

Required Supplementary Information

Schedule D

	Fiscal Year 2018	Fiscal Year 2017	Fiscal Year 2016	Fiscal Year 2015
Total Pension Liability				
Difference between expected and actual experience	($74,492)	($11,771)	$55,011	$0
Benefit payments	($68,771)	($58,990)	($78,553)	($78,553)
Net change in total pension liability	($143,263)	($70,761)	($23,542)	($78,553)
Total pension liability, August 31, 2017 - Pension value of benefits	$438,837	$509,598	$533,140	$611,693
Total pension liability, August 31, 2018 - present value of benefits (a)	$295,574	$438,837	$509,598	$533,140
Plan Fiduciary Net Position:				
Employer contributions	$78,500	$74,500	$45,800	$0
Pension plan investment income	$588	$428	$466	$914
Benefit payments - 3 retirees	($68,771)	($58,990)	($78,553)	($78,553)
Net change in plan fiduciary net position	$10,317	$15,938	($32,287)	($77,639)
Plan fiduciary net position, August 31, 2017	$20,318	$4,380	$36,667	$114,306
Plan fiduciary net position, August 31, 2018 (b)	$30,635	$20,318	$4,380	$36,667
Net Pension Liability, August 31, 2018 (a-b)	$264,939	$418,519	$505,218	$496,473
Plan fiduciary net position as a percentage of total pension liability	10.36%	4.63%	0.86%	6.88%
District's covered employee payroll - no active employees	$0	$0	$0	$0
Net pension liability as a percentage of covered-employee payroll	0.00%	0.00%	0.00%	0.00%

Notes to Schedule:
Pension plan assets are held in a group annuity contract for the BCWID Retiree Plan.
The measurement date of the net pension liability was August 31, 2018.

Brown County Water Improvement District #1
Schedule of Net Pension Liability
Fiscal Year Ended August 31, 2018

Required Supplementary Information

Schedule D

	Fiscal Year 2018	Fiscal Year 2017	Fiscal Year 2016	Fiscal Year 2015
Schedule of Contributions				
Actuarily determined contributions	$0.00	$0.00	$0.00	$0.00
Contributions in relation to the actuarily determined contribution	$0.00	$0.00	$0.00	$0.00
Contribution deficiency (excess)	$0.00	$0.00	$0.00	$0.00
Covered-employee payroll	$0.00	$0.00	$0.00	$0.00
Contributions as a percentage of covered-employee payroll	0.00%	0.00%	0.00%	0.00%

Notes to Schedule:

Contributions are not actuarily determined. The benefits for the three retirees were determined on the actual date of retirement. The pension paid to each retiree does not change. The District funds the BCWID Retiree Plan annually in September based on the amount needed to fully fund one year of retiree benefit payments.

The present value of benefits was calculated using the RP-2000 Mortality table at 5.5%. The present value of benefits was calculated as of August 31, 2018.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Board of Directors
Brown County Water Improvement District #1
Brownwood, Texas

I have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the business-type activities and each major fund of the Brown County Water Improvement District #1, as of and for the year ended August 31, 2018, and the related notes to the financial statements, which collectively comprise the Brown County Water Improvement District #1's basic financial statements, and have issued my report thereon dated December 10, 2018.

Internal Control over Financial Reporting

In planning and performing my audit of the financial statements, I considered the Brown County Water Improvement District #1's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing my opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Brown County Water Improvement District #1's internal control. Accordingly, I do not express an opinion on the effectiveness of the Brown County Water Improvement District #1's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

My consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during my audit I did not identify any deficiencies in internal control that I consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Brown County Water Improvement District #1's financial statements are free from material misstatement, I performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of my audit, and accordingly, I do not express such an opinion. The results of my tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of my testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Burl D. Lowery
